WORK EXPERIENCE

Executive Protection Field Office   **2021 – Present**
IT Specialist   *Woodbridge, VA*
- Provides support to over 400 assigned special agents, police officers, analysts, physical security specialists, and professional support personnel spread across three continents.
- Leads and trains staff on help desk procedures for submitting, tracking, and resolving all technical and desktop support issues using Remedy Ticketing Software.
- Manages and secures the end-to-end device management lifecycle for IOS devices from enrollment to configuration.
- Maintains a custom-made version control system to seamlessly integrate and manage updates for end-user devices.
- Ensures all devices remain compliant with IAVA standards by installing patches and updates.

Self-Employed   **2023 – Present**
Software Developer   *Remote*
- Designed, developed, and deployed dynamic web applications using HTML, CSS, JavaScript, and React.js, resulting in increased user engagement for clients across various industries.
- Proficiently integrated and managed both SQL and NoSQL databases, MySQL and MongoDB respectively, ensuring optimal performance, data integrity, and secure transactions for multiple projects.
- Leveraged Java and Spigot API expertise to create custom plugin software for Minecraft servers, enhancing gameplay and user experience for thousands of players.

US ARMY   **2018 – 2021**
Signal Support Team Lead   *Fort Bliss, TX*
- Led a highly specialized team, overseeing crucial communication assets valued over $6,000,000.
- Trained 10 technicians on the proper installation, maintenance and administration of IT and Communication equipment.
- Managed the organization's Communication Security program with zero incidents.

North Carolina Army National Guard   **2016 – 2018**
Communications Terminal Specialist   *North Carolina*
- Established and facilitated emergency voice, video, and data communication links.
